EXECUTIVE SUMMARY

W24 was a blockbuster week for European and Israeli dealflow. Two mega-rounds dominated headlines – NEURA Robotics (\$1.4B Series C, Germany) and Cyera (\$600M Series F, Israel) – but the real MAKR-actionable pipeline sits below those in the Seed-to-Series A band. Ten companies cleared the High Priority threshold across three verticals: AI Infrastructure/SaaS (6), Energy (1), and Health (3). The standout deal is Qorelo (Berlin, Seed, \$3.5M) – an SAP migration AI company that already has Mercedes-Benz as a customer, sits in the DACH heartland, and is just five months old. Two other strong signals: Voltify (Israel, \$30M Seed for rail electrification) and Theker (Barcelona, \$85M Series A for industrial robotics from CRV, Samsung, LVMH).

- AI agent infrastructure (governance, context, data) is attracting multiple \$7M–\$24M Seed/Series A rounds in Israel
- Industrial robotics is getting massive European backing (NEURA \$1.4B, Theker \$85M) – construction/logistics automation is a fundable category
- SAP migration urgency (2027 deadline) is creating a time-bound opportunity window for enterprise AI plays like Qorelo
- Health tech continues strong: surgical AI (Uncovr), specialist care platforms (01Health), and medtech (Nanordica) all raising in W24

Recommended immediate actions:

1. **Qorelo** (Berlin) – Direct founder outreach. Mercedes-Benz customer + DACH HQ + \$3.5M Seed = pre-Series A relationship window. MAKR's enterprise network is a direct accelerant.
2. **Capsa AI** (London) – Request intro via Antler or Cornerstone VC. Private capital AI OS with 14x YoY ARR growth and 100% renewal. Series B prep window.
3. **Voltify** (Israel) – Request intro via Aleph. \$30M Seed for rail electrification with Class I railroad pilot signed. Energy infra + smart city transport convergence.

Capsa AI

UK (London) | Series A | \$18M | June 10, 2026

AI INFRASTRUCTURE / SAAS – PRIVATE CAPITAL INTELLIGENCE

AI operating system for private equity and private capital firms. Indexes millions of internal documents, integrates with CRM/Outlook/SharePoint. 100% customer renewal rate, 122% net dollar retention, 14x YoY ARR growth. Total raised: \$20M.

MAKR ANGLE Direct strategic alignment – Capsa AI's platform could be used by MAKR itself for deal intelligence. More importantly, as a London-based AI SaaS with explosive unit economics and US expansion plans, this is a textbook MAKR Stage + Geography + Vertical fit. Why now: Series A just closed June 10. Series B likely 12–18 months. Relationship window is open.

WHY NOW Series A just closed June 10. Series B likely 12–18 months. Relationship window is open.

ACTION Request warm intro via Antler or Cornerstone VC (existing investors). Explore both investment and strategic partnership angles.

Voltify

Israel | Seed | \$30M | April 2026 (fresh)

ENERGY & SUSTAINABILITY – RAIL ELECTRIFICATION

Building the "Tesla of Rail" – comprehensive solution to convert diesel trains to electric power without massive infrastructure investment. Battery-powered locomotives + dynamic fast-charging + microgrid network. Paid pilot with a Class I railroad signed. Founded by Dafna Langer and Alon Kessel.

MAKR ANGLE Rail corridors are critical infrastructure in every European city. Voltify's distributed energy network along rail lines is dual-use: transport decarbonization + grid-edge energy storage. MAKR's smart city network can connect Voltify to European rail operators and municipal transport authorities. Why now: \$30M Seed closed recently. Pipeline growing with US regional rail operators. European expansion is the natural next step – MAKR can be the bridge.

WHY NOW \$30M Seed closed recently. Pipeline growing with US regional rail operators. European expansion is the natural next step – MAKR can be the bridge.

ACTION Request intro via Aleph (lead investor). Position MAKR as European market entry partner.

WATCHLIST (8)

· | Company | Country | Stage | Amount | Why Watching |

· | Nanordica Medical | Estonia | Seed | €1.6M | Antibiotic-free wound dressing. Deep tech medtech from Nordics. CE marking pending. Monitor for clinical trial results. |

· |-----|-----|-----|-----|-----|

· | Definic | Slovakia | Seed | €2.5M | Vendor intelligence platform, DACH/UK expansion, strong efficiency metrics. Monitor for Series A with traction evidence. |

· | Upriver | Israel | Seed | \$14M | Enterprise data engineering for AI. Strong backers (Hetz, Valley Capital). Unity as customer. Monitor for EU expansion. |

· | Conntour | Israel | Seed | \$7M | AI video intelligence for surveillance. General Catalyst + YC backed. Singapore deployment. Smart city security angle. Monitor for EU city pilots. |

· | Merchantee | Czech Republic | Seed | €1.8M | AI marketplace intelligence for e-commerce. Philips, Lindt as clients. Poland/Germany expansion. Monitor for DACH traction. |

· | Bestie Bite | Italy | Pre-Seed | €1.5M | AI hospitality/restaurant discovery. 70K users, 70 countries. Tourism/engagement vertical. Very early – monitor for Seed. |

· | Duely | Belgium | Pre-Seed | €1.1M | AI-native M&A; legal services. European expansion planned. Monitor for Seed round. |

· | Upstream | France | Pre-Seed | \$3M | AI-native inbox/email. YC + Xavier Niel backed. Very early but strong backers. Monitor for Seed. |
