HIGH  
PRIORITY

**3**

WATCH  
LIST

This brief is produced by Jaimee — MAKR Switzerland's AI-native scouting platform — as part of Workflow 1 (WF1): Deal Sourcing & Origination. Each weekly edition systematically scans European and Israeli startup ecosystems for funding rounds aligned with MAKR's investment thesis: AI-first companies at Seed–Series A stage, operating in EU and Israeli markets, with smart city, infrastructure, health, energy, or industrial AI applications. "Companies tracked" refers to the cumulative scouting pipeline registered across all WF1 weekly editions by the MAKR Switzerland team — the full registry appears in Appendix A. This report is prepared for Jerome Vasamillet and the MAKR Switzerland investment team to support pipeline management, founder outreach prioritisation, and competitive market awareness. New leads sourced this week are flagged in Appendix A as "Sourced by Jaimee."

---

## EXECUTIVE SUMMARY

### PREVIOUS WEEK RECAP

WK37 Recap: Israeli tech returned from summer with a surge — nine rounds announced September 1–4 totalling \$1.4 billion, with AIR Security (\$50M combined seed, AI agent tool/MCP firewall, Unit 8200 / Sequoia / Greenoaks) and Huskeys (\$27M Series A, network edge AI security for agent traffic, Blackstone / Shlomo Kramer) as the two MAKR-range standouts. Europe contributed a strong AI infrastructure cluster: Zeit AI (Munich, €5M seed, ex-Palantir autonomous data engineer, €1M ARR in 12 months) and Atira (Munich, \$17.5M combined seed, industrial AI for RFQ automation, Accel / ABB E-mobility) deepened MAKR's emerging German AI concentration, while AI Score (London, \$5.4M seed, EU AI Act compliance platform, ex-NCSC founders) positioned as the governance layer above the agent security stack. Octave.energy (Belgium, €10M Series A) was the WK37 cleantech standout — profitable for three consecutive years with 200 MWh deployed across 400+ businesses, an exceptional characteristic for any CleanTech Series A. WK37's structural thesis crystallised: AIR Security, Huskeys, AI Score, and Zeit AI as four non-competing positions across the same emerging AI agent stack.

### THIS WEEK

WK38 is the first full post-summer week. The standout entry is Arlequin AI (Paris, €28M Series A, Sep 10) — a French company deploying proprietary topological neural network models for criminal investigation, fraud, and AI security across four EU countries, backed exclusively by European investors. This is MAKR's first exposure to the "EU sovereign AI architecture" thesis at Series A: a company building its own model architecture (not fine-tuning transformers) with EU-native investors, EU deployment, and a founding team with rare applied intelligence credentials. Volve (Oslo, \$3M seed, Aug 25) is the cleanest new Construction/Industrial AI entry since Gigaton (WK25): AI-native preconstruction tendering with Skanska as anchor customer and OBOS Ventures as both investor and embedded distribution. Grubel (Munich, €3M pre-seed) brings the highest-quality angel roster of any pre-seed seen in 2026 — Jeff Dean, Ion Stoica, Harvey co-founders — backing case-adaptive legal AI from four AI researchers. Both Arlequin AI and Volve are captured as WK37-gap entries (announced Sep 7–14 but not indexed in time for the WK37 brief); Grubel is a WK37-window announcement formally captured now per methodology. Critical escalation — amber window entering final close: amber (WK36 #1, announced Aug 17) reaches Day 28–34 this week. WK36 protocol established Day 21 as mandatory escalation; WK37 triggered that escalation. Day 35 is the hard close per the 21-day discipline established in WK36 — this is the last week for any warm introduction before the window formally closes. Jerome direct outreach to Bastian Maiworm is mandatory now.

- **\*\*EU sovereign AI architecture:\*\*** Arlequin AI is the first large Series A in Europe building proprietary model architecture with all-European capital — topological neural networks vs. transformer fine-tuning. EU AI Act + defence budgets create a structural tailwind for sovereign AI models.
- **\*\*Nordic construction AI cluster forming:\*\*** Volve joins Gigaton (WK25) and Visoid (WK35) as MAKR's third construction/preconstruction AI entry. Nordic market proving strong — Skanska (Sweden) and OBOS (Norway) both serving as anchor investors and customers.
- **\*\*Legal AI as a standalone B2B vertical:\*\*** Grubel (WK38) and Pharosyn (WK37 WL) represent back-to-back weeks of regulated-professional-services AI. Legal is following the healthcare AI pattern — clear workflow automation with regulatory protection and high switching costs.
- **\*\*Munich AI cluster now confirmed:\*\*** Four MAKR-tracked companies in four consecutive weeks (amber WK36, Zeit AI + Atira WK37, Grubel WK38). Munich is MAKR's primary German AI investment theatre.
- **\*\*WK37 HP activation window:\*\*** AIR Security, Huskeys, Zeit AI, Atira, AI Score, Octave.energy all enter Day 7–14 of outreach window this week — all should be in active founder contact by WK38 close.

Recommended immediate actions:

1. **\*\*amber (WK36 #1)\*\*** — Day 28–34 this week. LAST WINDOW. Jerome direct LinkedIn to Bastian Maiworm (CEO, Aachen) via Ventech Paris or direct. Formally close if no confirmation by Sep 20.
2. **\*\*Arlequin AI\*\*** — Freshest large Series A of WK38. redalpine (Zurich) or OTB Ventures (Warsaw) intro. Lead with sovereign AI + EU AI Act narrative. Request EU deployment case studies + ARR breakdown by sector.
3. **\*\*Volve\*\*** — Skyfall Ventures intro (warm MAKR channel, established via Visoid WK35). Lead with construction/infrastructure thesis. Request Skanska customer case + public sector pipeline.
4. **\*\*WK37 HP follow-through\*\*** — AIR Security / Zeit AI / Huskeys / Atira at Day 7–14. Confirm all introductions initiated; any uncontacted = immediate outreach this week.
5. **\*\*Grubel\*\*** — Pre-seed = early for direct entry. Intro via Point Nine. Build relationship now for seed round in 9–12 months.

| Company         | Country              | Stage    | Amount   | Reason Not HP                                                                                                                                                         | Monitor For                                                                        |
|-----------------|----------------------|----------|----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------|
| <b>Catch</b>    | Israel<br>(Tel Aviv) | Seed     | \$5M     | Narrow use case: executive admin automation (scheduling, email, research). AI agent infra adjacent but limited enterprise infrastructure thesis fit at current scope. | Series A with expanded enterprise workflow coverage<br>HP upgrade                  |
| <b>Zerolook</b> | Switzerland (Zug)    | Pre-Seed | CHF 1.5M | Very early stage; niche vertical (AI flight shopping API). Small raise limits direct entry. Zug geography.                                                            | Seed round; mobility or smart city product expansion                               |
| <b>Harmony</b>  | Israel               | Seed     | \$34M    | Investor roster unverified as of WK38. \$34M seed is aggressive pricing pending backer confirmation.                                                                  | Tier 1 IL VC confirmed immediate HP upgrade + outreach via confirmed lead investor |
